

Fibre is here – get connected

If you haven't already connected to fibre or your business isn't fibre ready, now's the time to get that under way.

With the work already happening in the street outside, there's no better time to get connected to avoid any further disruptions.

Want to get connected? All you need to do is contact your service provider and say you want to connect to the Chorus fibre network. It's that easy.

Just want to get your building fibre ready and go live later? That's easy too. Just visit: <https://www.chorus.co.nz/fibre-ready> to register.

Either way a Chorus tech will be in touch to make an appointment to see what needs to be done. Once they agree the how with you, they will either do the work there and then or come back to do it on a day that is convenient to you.

More information here: <https://www.chorus.co.nz/>
